

a Strict feature partition

ϵ_r^{CM} (0 parameters) — Clausius-Mossotti anchor

LST branch | 30 features

ionic polarizabilities (α_A, α_B), soft-mode proxy,
Reaney regime $I_a/I_b/III/III$, field strengths,
CM baseline ($\epsilon_r^{\text{CM}}, \sigma_{\text{CM}}$), SOJT weighting...

Tilt branch | 30 features

Goldschmidt tolerance t , octahedral factor,
tilt-angle proxy, bond-angle variance,
A-site size mismatch, A-site electronegativity...

Residual branch | 43 features

sintering T / time, crystal system, space group,
configurational entropy, A-off-centring fraction,
VCA flag, GII...

103
physics
